

Manufacturer Spotlight

Universal Machining Industries, Inc.

Universal Machining Industries, Inc. (UMII), located in Muenster, Texas, is an innovative manufacturing organization dedicated to value-added CNC milling and CNC turning processes. Wholly owned by Steve & Melissa Trubenbach, UMII utilizes state-of-the-art machine tool technology along with an intense depth of experienced personnel to produce complex machined components and assemblies for the Aerospace, Defense, Oil & Gas and Commercial Industries.

Universal Machining Industries was established in 1997 with a strong management directive toward Quality and Customer Satisfaction. UMII is AS9100D certified and uses LEAN initiatives to provide exceptional products at a competitive price. Our management believes in using the most current high-tech equipment and employing dedicated, skilled employees. Many customers have praised the “world class” processes and procedures developed by the personnel at UMII.

With 81,000 square feet of manufacturing space UMII has approximately 100 employees. Because of a sustainable backlog UMII has acquired adjacent un-developed property for expansion.

Mr. Trubenbach believes that the success of UMII is due in large part to the employees of his company. UMII is committed to providing challenging job opportunities for area residents that will allow them to remain local and still achieve their rewarding career, financial, and family goals. The company offers an attractive benefit and compensation package that rivals those found in the Metropolitan area - all without having to leave Cooke County.

Owner Steve Trubenbach served nine years on the Muenster school board and serves on the Cooke County Manufacturing Consortium. He is engaged with NCTC and the Career Tech programs in machining and is on the advisory board for Texas State Technical College in Waco. UMII is an advocate for educators and manufacturers working together to create student career paths in manufacturing.

There are a wide variety of job opportunities at UMII ranging from Purchasing, Processing, Deburr Technician, CNC Machinist, to Engineering. For more information about the Cooke County Manufacturer Consortium and manufacturers in Cooke County contact Arleene Loyd, Executive Director, Gainesville Economic Development Corporation at 940.665.5241.
